Mr. Charles W. Kirman  
Environmental Health & Safety Manager  
Safety-Kleen Corp.  
109 Connecticut Avenue  
Burlington, New Jersey 08016

Dear Mr. Kirman:

This letter of authorization is to notify you that the Department of Environmental Protection (Department) has approved your application to operate an Intermodal Container Facility. The facility number which has been assigned to your registration package, under N.J.A.C. 7:26-3.6, is 0306001416.

All correspondence pertaining to this filing package must refer to the assigned facility number. The site is known as Block 120, Lot 1 located in Burlington Township

Please be informed that the application submittals are complete and in accordance with N.J.A.C. 7:26-3.6. Furthermore, this authorization grants you authority to construct and operate your Intermodal Container Facility provided that the operation of the facility complies with the performance standards set forth at N.J.A.C. 7:26-3.6(g).

Construction and operation of the Intermodal Container Facility shall be conducted in conformance with the following application documents. These documents are:

- a) Application for an Intermodal Container Facility submitted by Safety-Kleen Corporation on November 5, 1997;
- b) Drawing SK-C1, Site Plan for Safety-Kleen Corporation, signed and sealed by James Feeney, P.E., N.J.P.E. License No. 38638 on October 24, 1997 and submitted on November 5, 1997;
- c) Response Documents submitted on January 26, 1998 and

March 5, 1998 submitted by Safety-Kleen Corp.

This approval authorizes Safety-Kleen Corp. to accept 25 cubic yards per day (volume equivalent equal to 5,000 gallons per day) of waste I.D.#27 and 5,000 gallons per day of waste I.D.#72. Department approval shall be obtained prior to any expansion, enlargement or other modification to the approved operations.

It is noted that Safety-Kleen Corp. submitted a request for a waiver from the performance standards set forth at N.J.A.C. 7:26-3.6(g)1. Safety-Kleen Corp. requested consideration from the Department for a waiver of the seventy-two (72) hour storage requirement for waste I.D.#27. A waiver was requested which if approved would allow Safety-Kleen Corp to store waste I.D.#27 material for a period of time not to exceed ten (10) days. Safety-Kleen Corp. has stated that all waste I.D.#27 material to be accepted at the intermodal container facility (ICF) will be delivered in either sealed drums or intermodal containers. Further, all waste I.D.#27 material will be staged and stored indoors prior to transfer to a final disposal facility. Finally, all waste I.D.#27 material to be accepted at the ICF is classified as non-putrescible waste.

The Department has evaluated all of the information submitted by Safety-Kleen Corp. related to the request for a waiver. Based upon the Department's review, Safety-Kleen Corp is granted a waiver from the performance standards set forth at N.J.A.C. 7:26-3.6(g)1. Therefore, Safety-Kleen Corp is allowed to store waste I.D.#27 material for a period not to exceed ten days. The Department's approval is subject to the following conditions.

Safety-Kleen Corp. shall accept all waste I.D.#27 material in either sealed drums or intermodal containers. Further, Safety-Kleen Corp is prohibited from receiving waste I.D.#27 material in tarped roll-off containers. Safety-Kleen Corp. shall only accept waste I.D.#27 material which is classified as non-putrescible. Finally, Safety-Kleen Corp. is prohibited from conducting any transfer of waste I.D.#27 material between containers.

Eligibility for this authorization shall terminate and the facility shall cease operations if any of the following occur:

- 1) The owner or operator fails to obtain any applicable permits or approvals required by Federal, State, county and local statute, rule and ordinance, including but not limited to: Green Acres Program, Stream Encroachment, Wetlands, NJPDES/DGW, Sanitary Landfill Closure/Post Closure, Soil Conservation District approval, etc.;
- 2) The owner or operator fails to comply with N.J.A.C. 7:26-3.6 or;
- 3) The Department determines that the facility poses a threat to public health, safety, or the environment.

You should be aware that N.J.A.C. 7:26-4.3 requires a \$260.00 compliance monitoring fee and N.J.A.C. 7:26-4.7 requires an annual fee of \$150.00 for the costs of reviewing and maintaining the quarterly reports. Both fees are due on January 1 of each year.

If you have any questions regarding the Department's decision, please contact Mr. Tom Byrne of my staff at (609) 292-9880 or at our e-mail address: tbyrne@dep.state.nj.us.

Sincerely,

Signed by John A. Castner, P.E., P.P., Assistant Director
